Introduction

Introduction

AI is also known as Artificial Intelligence which we are using to train the images that we have captured for playing the game using **TensorFlow.js** library. Then when we play with Machine, it will play against you and update score in the scoreboard.

Overview

Overview

In this project we will be playing with a machine which is trained using AI for image processing, as the game will be played using the webcam and it will try to predict our hand gesture and play along.

First we need to train our hand gesture images as rock, paper and scissors and then input that trained images into our project and get going.

Technologies and Requirements

—

Technologies and Requirements

Framework: Django

Front-End: HTML, CSS, JavaScript

Back-End: Python, TensorFlow.js,
PostgreSql

Table Design

Table Name: UserRegistration_Details

Primary Key: UID

Description: This table is used to store User Registration Details

Field Name	Data Type	Size	Description
UID	<u>varchar</u>	20	User Identification
<u>FName</u>	<u>varchar</u>	20	First Name
<u>LName</u>	<u>varchar</u>	20	Last Name
<u>Upwd</u>	<u>varchar</u>	20	User Password
<u>LLogindate</u>	date	10	Last Login Date

Table Name: Account_Details

Primary Key: UID

Description: This table is used to store Account Details

Field Name	Data Type	Size	Description
UID	<u>varchar</u>	20	User Identification
<u>Upwd</u>	<u>varchar</u>	20	User Password

Table Name: Result_Details

Primary Key: RID

Foreign Key: UID

Description: This table is used to store Result Details

Field Name	Data Type	Size	Description
RID	<u>varchar</u>	20	Result Identification
UID	<u>varchar</u>	20	User Identification
<u>GScore</u>	int	5	Game Score

Conclusion

With the ever-increasing use of computer in the concern it is necessary to computerize the activities of the concern. By using this activities the computer reduces the workload of the user, increases the efficiency and the speed of generating outputs. A good amount of user-friendly features have been incorporated in the proposed system. And it is possible for any user to exploit this feature to get the maximum benefit. The programming techniques used to design the system provide a scope for the further expansion and implementation of changes, which may occur in the future.

Thank You
